

Safety Factor; Your high occupancy lanes on the interstate are a waste of money most of the time they are empty or have someone with a blow up doll going down one. Cost per vehicle using them is out of site
They should be converted to "TRUCKS ONLY" this would keep the trucks carrying all of our commerce through out the States out of the way of all the cars in a big hurry. Much less Car Truck conflicts per mile
Much higher lane usage per mile cost.

Tired Drivers; NO DRIVER should have to load or unload freight.

Tired Drivers; Need to allow Drivers to split sleep sessions on log book no 14 hr rule

Tired Drivers; Need more parking spaces for drivers to take a break, without breaking the law.

Tired Drivers; Need to stop the split speed limits it only causes fatigue and driver conflicts when every car passed us and cuts in front of us
